Greenfinch or Green Linnet *(Ligurinus chloris).* A bird of the Finch family common in Britain. It builds a nest of fibres, moss, hair, etc., loosely constructed, and lays from four to six greenish-white eggs with brown or grey spots, two broods often being reared in one season. The **Poppy** *(Papaver rhœas)* is a plant common in the English cornfields. It has a small medicinal worth, but is more valued for the rich colour of the blossom.

(FOR ADDRESS ONLY.)

Printed in England.
